## SPREAD OF ALFALFA WEEVIL IN 1939

By J. C. Hamlin, senior entomologist  
Bureau of Entomology and Plant Quarantine  
United States Department of Agriculture

Scouting for alfalfa weevil by Bureau employees during 1939 was severely limited, but the joint efforts of State and Federal workers revealed occurrence of the weevil in four counties not heretofore known to be infested in three States. The new infestations are as follows: Colorado, Larimer County; Nebraska, Morrill and Sheridan Counties<sup>1/</sup>; Wyoming, Crook County.

---

<sup>1/</sup>Reported by the Bureau of Entomology and Plant Quarantine in cooperation with L. M. Gates, of the Nebraska Department of Agriculture and Inspection.

Details of this season's scouting by Bureau personnel of the alfalfa weevil laboratory are summarized in table 1, which shows 129,775 sweeps of an insect net taken in 236 fields in 51 counties in 9 western States. Table 2 shows results of sweeping in counties heretofore found infested.

1/ In cooperation with M. L. Jones, of the California Department of Agriculture, except in Solano County.

2/ Also reported infested by J. H. Newton, of the Colorado Department of Agriculture.

3/ No scouting by Bureau of Entomology and Plant Quarantine, but R. A. Fisher, of the Idaho Experiment Station, reported scouting around Salmon, in Lemhi County, with negative results.

4/ Garden, Morrill, and Sheridan Counties scouted in cooperation with L. M. Gates, of the Nebraska Department of Agriculture and Inspection.

5/ Scouting in this county by L. M. Gates, of the Nebraska Department of Agriculture and Inspection, yielded negative results.

6/ Frank McKennon, of the Oregon Department of Agriculture, reported that State inspectors scouted in Wallowa and Lane Counties, with negative results.

<sup>1/</sup> Reported by M. L. Jones, of the California Department of Agriculture.

<sup>2/</sup> Reported by J. H. Newton, of the Colorado Department of Agriculture.

<sup>3/</sup> Reported by R. A. Fisher, of the Idaho Experiment Station.

<sup>4/</sup> Reported by L. M. Gates, of the Nebraska Department of Agriculture and Inspection.

<sup>5/</sup> Reported by Frank McKennon, of the Oregon Department of Agriculture.  
In Union County the weevil was found farther north than heretofore.

<sup>6/</sup> Reported by Margaret Greenwald, of the Wyoming State Entomology Office.
